ABOUT ME

I am a computer science student passionate about technology and software development. I am proactive and a team player person, currently working with Frontend technologies. I enjoy learning new things to expand my knowledge in problem solving using different technologies.

EDUCATION

Platzi bootcamp - 2022

Bootcamp fullstack developer created for premium subscribers of Platzi's online academy. This study program covered Javascript, HTMl, CSS, React for frontend development and Node, Express, MongoDB and PostgreSQL for backend development.

42 school - 2020 / now

International computer science school

PROJECTS EXPERIENCE

PLATZI E-COMMERCE

Final project for Platzi Bootcamp, an E-commerce app created by a team of 6 people. I participated in the group in charge of creating the user interface with the frontend team. the whole project was built using React, Redux, Node.js, Express, MongoDB and JWT Auth.

IMAGE SHARER

this project is a CRUD for uploading images and gifs. it was built using the MERN stack. other technologies used for this project were Tailwind CSS, Formik and Api Context.

REST COUNTRIES API

My solution to the FrontendMentor challenge, in which you have to create a page that consumes the REST Countries API. this project was built using React, React Router, Api fetch and Bootstrap

MY PROJECTS

you can find all my projects and the technologies I use on my github repository: https://github.com/ElDev1
